Snowflake Assignment-1

Steps to Create a Snowflake Account and Connect Using SnowSQL

Step 1: Create a Snowflake Account

1. Open the official Snowflake website:
[Snowflake Free Trial](#)
2. Click **Start for Free**.
3. Fill in the required details:
 - a. First Name & Last Name
 - b. Email Address
 - c. Company/Organization Name
 - d. Country/Region
4. Select:
 - a. **Cloud Provider** (AWS/Azure/GCP)
 - b. **Region**
5. Verify your email and activate the account.
6. After login, note down:
 - a. **Username**
 - b. **Password**
 - c. **Account Identifier** (important for SnowSQL connection)

You can find the **Account Identifier** from the Snowflake URL.

Step 2: Install SnowSQL

1. Download SnowSQL from:
[SnowSQL Download Page](#)
2. Choose your operating system:
 - a. Windows
 - b. macOS
 - c. Linux
3. Install SnowSQL by following the setup instructions.
4. Verify installation using terminal/command prompt:

```
snowsql -v
```

If installed successfully, the version number will appear.

Step 3: Connect Snowflake Using SnowSQL

Open **Command Prompt / Terminal** and run:

```
snowsql -a <account_identifier> -u <username>
```

Example:

```
snowsql -a abc12345.us-east-1 -u john123
```

After executing:

- Enter the password when prompted.
- If credentials are correct, SnowSQL will connect successfully.

Successful connection looks like:

```
* SnowSQL *
```

```
Connected to:
```

```
Snowflake version ...
```

Comparison of Snowflake Web UI and SnowSQL

Feature	Snowflake Web UI	SnowSQL
Interface Type	Graphical User Interface (GUI)	Command Line Interface (CLI)
Ease of Use	Beginner-friendly and easy to navigate	Requires command-line knowledge
Query Execution	Queries executed visually using worksheets	Queries executed through terminal
Visualization	Supports dashboards and visual monitoring	No graphical visualization
Accessibility	Accessible through web browser	Requires local installation
Automation	Limited automation support	Supports scripting and automation
Performance	Best for interactive work	Faster for repetitive tasks
File Handling	Easy upload and download through UI	Command-based file handling
Best For	Analysts and beginners	Developers and administrators
